

Innovative | Ethical | Transparent

your specialty tax partner for a wide variety of business verticals

# about engineered tax services

Engineered Tax Services is one of the country's only professionally licensed engineering firms that provides best-in-class specialty tax services to CPAs, their clients, architects, engineers, and other professional service firms. With over 20 years in business and its team of CPAs, tax attorneys, and engineers, Engineered Tax Services helps clients add value to their client relationships by providing sophisticated strategies like cost segregation, research and development tax credits, and other specialized credits and incentives, allowing them to retain more working capital and drive profitability. It has met with the highest level of success under IRS scrutiny, coupled with the highest possible tax savings of any provider in its industry.

# **Cost Segregation**

If you own real estate, the best way to reduce your tax liability is by applying cost segregation. This type of analysis properly classifies the components of your building (whether newly constructed, purchased or renovated) into shorter recovery periods (or useful lives) to shorten the depreciation period. The result? You can increase tax write-offs and reduce taxable income.

Engineered Tax Services provides a detailed engineering review as part of our reporting process and works seamlessly with your existing CPA for minimal disruption to your business.

#### When Should I Commission My Cost Segregation Study?

- Cost segregation can be <u>performed anytime</u> even without amending your tax returns.
- However, the <u>best time</u> is immediately after the property is placed in service, which will ensure your ability to increase depreciation and to write-off assets removed during remodeling or replacing building components.
- Performing a study in the year of acquisition also ensures your ability to claim bonus depreciation which can create a write off as high as 30% of your total purchase price in the first year.

# Engineered Tax Services Provides The Following Cost Segregation Services:

- · A free, no-risk cost-benefit analysis. Plus, we:
- Evaluate your current tax status and future business plans to determine the applicability of a cost segregation study specifically for your project
- Visit the facility/project or provide virtual <u>Tele-Engineering™</u> services to determine how the components and systems are utilized and document the systems and components

- Provide a detailed engineering review of the assets, including special purpose mechanical and electrical systems, decorative finishes, site improvements, and any process related to special purpose construction
- Complete a written report with the asset detail supporting the reclassifications and complete the necessary tax form(s)

#### **Bonus Depreciation Example**

Existing Real Property Acquired	Prior & New Law		Prior Law		New Law	
\$2,500,000 Purchase (excluding land allocation)	SL 39-Year Depreciation without Cost Segregation		Cost Segregation MACRS (no bonus)		Cost Segregation MACRS (with 80% bonus)	
5-year Personal Property	0%	\$0	24%	\$600,000	24%	\$600,000
15-year Personal Property	0%	\$0	6%	\$150,000	6%	\$150,000
<b>39-year</b> Real Property	100%	\$2,500,000	70%	\$1,750,000	70%	\$1,750,000
Approximate 1st Year Depreciation	\$64,103		\$174,872		\$672,985	

Bonavista Holdings, Inc. is a real estate holding company with approximately 1,000,000 square feet of commercial space located primarily in Broward and Palm Beach Counties. Our firm engaged Engineered Tax Services to perform a cost segregation study on our behalf. I received a favorable result that exceeded all of my expectations. I found Mr. Gonzalez to be extremely competent, thorough, and knowledgeable of the subject matter. I had used other firms to do similar work previously, and none compared to the expertise and professionalism exhibited by Mr. Gonzalez's firm. Needless to say, I would highly recommend his firm, and I would not hesitate to use his services in the future."

Marvin Feinstein | Principal of Bonavista Holdings, Inc.

## **R&D Credit**

Every company improves products and processes to remain competitive; the government rewards them through research and development (R&D) tax credits. If you qualify, you can maximize your company's cash flow and bottom line.

#### How Do I Know If I Qualify For R&D Credits?

#### The Four-Part Test

If you can pass this four-part test, your activities constitute qualified research, according to criteria established by the IRS:

- 1 Permitted Purpose
  The activities must relate to
  - The activities must relate to new or improved business components, function, performance, reliability, and quality.
- Technological in Nature
  The activity performed must fundamentally rely on principles of physical or biological science, engineering, and computer science.
- Elimination of Uncertainty

  The activity must be intended to discover information to eliminate uncertainty concerning the capability, method, or design for developing or improving a product or process.
- Process of Experimentation
  The taxpayer must engage in an evaluative process that can identify and evaluate more than one alternative to achieve a result. This may include modeling, simulation, or a systematic trial and error methodology.

#### When Does It Make Sense to Claim R&D Credits?

- The federal R&D credit is 7-10% of your qualifying expenses, which may include salaries and wages, outside contractors, and supply costs used in developing your product.
- R&D tax credits offset your federal (and some state) income taxes, and apply as an offset of the taxes you owe. They may also apply to company paid payroll taxes.
- Companies that have patents, or are designing, developing or building new products commonly see the value and can claim R&D credits as much as 3-years retroactively, and each year going forward.

Sample 2022 Federal Alternative Simplified Credit Calculation

Qualified Research Expenses	
Wages	\$1,000,000
Supplies	\$150,000
Contract Research at 65%	\$100,000
Total 2022 QREs:	\$1,250,000
2021 QREs	\$950,000
2020 QREs	\$850,000
2019 QREs	\$750,000
Total Base Period QREs	\$2,550,000
Base Amount (3-year Average QREs @ 50%)	\$425,000
Gross Credit Benefit	\$115,500
Net Credit Benefit with 280C Election	\$91,245

# **Energy Incentives**

Are you a builder, owner, or developer of residential homes and apartment buildings? Then you can earn tax credits and deductions for energy efficiency, if your properties meet certain qualifications.

#### **45L Energy-Efficient Home Tax Credits**

If you're a developer of energy-efficient buildings, you can obtain a <u>45L Energy-Efficient Home Tax Credit</u> of \$500 to \$5,000 per residential unit or dwelling. The benefit is dependent on how energy efficient a design may be along with meeting set Prevailing Wage requirements. Qualifying properties include apartments, condominiums, townhouses, and single-family homes.

Note: The 45L energy-efficient residential tax credit was extended and is in effect through the end of 2032. You can carry over any unused credits for up to 20 years.

#### **Eligible Properties For 45L Tax Credits**

Each unit should provide a level of energy efficiency equal to the Energy Star standards. We recommend that you evaluate any multifamily or single family project developed within the past four years, whether new construction or substantial renovation, for the 45L tax credit.

- Residential properties with units occupied after January 1, 2023: any number of stories.
- Residential properties with units occupied before December 31, 2022:
   3-stories or less.
- Builders/owners/developers must incorporate energy-efficient features such as high R-value insulation and roofing, windows, doors, and/or HVAC systems.

#### **45L Tax Credit Requirements**

A licensed professional who's an unrelated third party to the project must complete the certification. We provide 45L certifications that our licensed professionals evaluate, model, and sign off. Once we complete your certification, you'll receive a certification package with all necessary documentation and certifications to sustain the tax credit in the case of IRS audit.

#### The 179D Energy-Efficiency Tax Deduction

Recently under the Consolidated Appropriation Act of 2021, the 179D Commercial Buildings Tax Deduction, also known as the 179D EPACT Tax Deduction, was made permanent. It incentivizes the design and installation of energy-efficient building systems and energy conservation for building owners of high-rise multifamily projects and commercial buildings. The 179D deduction can also be allocated to the architect or engineer who designed the technical specifications for a public entity, non-profits, tribal properties, and REITs.

#### How Much Is The 179D Energy Policy Act Deduction?

For buildings placed in service after January 1, 2023:

 Tax deduction ranges from \$0.50 to \$5.00 per square foot depending on the range of 25-50% energy reduction and meeting set Prevailing Wage and apprenticeship requirements.

#### For buildings placed in service before December 31, 2022:

- Maximum deduction \$1.80 per square foot = 50% reduction in total annual energy and power costs
- Partial deduction \$0.60 per square foot/per system for reduction of energy consumption through building envelope, HVAC, and lighting;

#### What Are The Requirements?

The improvements must reduce total annual energy and power costs with respect to the interior lighting systems and heating, cooling, ventilation, and hot water systems. Using IRS approved software, our licensed professionals complete the energy modeling analysis and certification. Technical designers must also obtain a signed allocation letter from the tax-exempt entity to secure their deduction.

I want to thank you for the cost segregation and energy tax credit work you have done. The results have been very favorable and have resulted in significant tax benefits. We look forward to working with Engineered Tax Services in the future."

Lewis B. Kevelson, CPA | Partner at Rachlin LLP

# Wireless Infrastructure Technology

Wireless technology is the next phase of cellular telecommunications that's being rolled out worldwide. It's become a top priority for the deployment for cellular carriers in the United States. But the problem is, where to locate the wireless towers?

The wireless providers we work with are seeking two kinds of leases with property owners for their antennas:

- rooftop leases for installing antennas on building rooftops and
- land leases for installing antennas on the property they own.

We install cell towers for cellular devices and cable towers for cable TV transmission.

#### The Program

For over a year now, Engineered Tax Services (ETS) has been developing its Wireless Infrastructure Technology (WIT) enterprise. We partner with commercial real estate owners to maximize rooftop and land revenue and cellular technology. As part of its service package, Engineered Tax Services, on the behalf of its WIT clients:

- · sources wireless carriers
- negotiates the most advantageous long-term leases
- manages permits
- · implements the construction process and
- services the equipment throughout the lease's life.

#### **Three Options We Offer:**

#### Scenario 1 – Rooftop Buyout

- There's a current tenant, and the building owner wants to sell the lease.
- Our call center will contact ETS clients with existing tenants and request interest in selling their lease(s).

#### Scenario 2 - Site Marketing & Revenue Share Buyout

- There's no current tenant. The building owner wants a third party to market the building to new tenants.
- Our leasing team will market sites directly to carriers.

#### Scenario 3 – Site Management & Revenue Share Buyout

- There's a current tenant. A building owner wants a third party to manage the existing lease.
- We will amend any leases as needed for the building owner and will manage all tenant interactions.

#### The WIT Process

We make it easy to obtain wireless leases.

We will deliver a proposal to clients within a day or two of speaking with them. Once we agree on terms, we can typically close and fund the transaction in 45 to 60 days.

#### **Benefits to Clients**

Clients who've never hosted a wireless tower can benefit by earning additional revenue while leasing unused space.

In addition, existing cell tower lease owners can benefit by:

- · saving for retirement
- paying off debt
- using the proceeds for a more lucrative investment opportunity, and most importantly
- eliminating any and all risk that their lease gets terminated and their income goes away.

# **Employee Retention Credit**

#### **Claim Your Employee Retention Credit Now:**

#### December 31, 2021 Deadline!

Act now! Eligible employers who retained employees during the COVID-19 pandemic have until December 31, 2021 to claim the <a href="employee retention">employee retention</a> credit (ERC).

With the new law, retroactive to March 27, 2020, employers who received Paycheck Protection Program (PPP) loans can claim the ERC for qualified wages not treated as payroll costs in obtaining forgiveness of the PPP loan.

You can earn a refundable credit of up to \$5,000 for each full-time employee you retained between March 13 and December 31, 2020, and up to \$14,000 for each retained employee between January 1 and December 31, 2021.

You qualify as an employer if you were ordered to fully or partially shut down, or if your gross receipts fell below 50% for the same quarter in 2019 (for 2020) and below 80% (for 2021).

- If you weren't in business in 2019, you can use the corresponding quarters from 2020.
- You can claim your credit immediately by reducing payroll taxes sent to the IRS.
- If your credits exceed payroll taxes, you can request a direct refund from the IRS.

Contact us to see if you qualify under your special circumstances.

# **Engineered Advisory Accelerator**

# A cohort of advisory minded public accounting firms focused on providing exceptional service to clients by functioning as trusted in-depth advisors.

The <u>Advisory Accelerator</u> was created for CPAs who want to offer a full range of advisory services outside their personal expertise to their clients. Their clients get access to leading, strictly vetted professionals across a wide range of the advisory spectrum. Our specialized experts work behind the scenes to help our members "punch above your weight class" and drive significant value into their client relationships, while holding competitors at bay.

Contact us at  $\underline{\text{www.engineeredadvisory.com}}$  to learn more about how you can take advantage.

# **Work Opportunity Tax Credits**

Work Opportunity Tax Credits (WOTCs) are a federal tax program that rewards companies that hire certain targeted groups that have consistently faced significant barriers to employment. The WOTC is a dollar-for-dollar tax credit (not a percentage) of IRS taxes owed.

You can claim WOTCs until December 31, 2025. The program rewards the hiring of qualified IV-A (Temporary Assistance for Needy Families) recipients; qualified veterans; ex-felons; designated community residents; vocational rehabilitation referrals; summer youth employees; Supplemental Nutrition Assistance Program (SNAP) recipients; Supplemental Security Income (SSI) recipients; Long-Term Family Assistance recipients; and Qualified Long-Term Unemployment recipients.

Using geographic incentive credits, the federal government has designated certain economically depressed areas as tax advantage areas, or Empowerment Zones. If your business is located in one of these areas and employs individuals living in the same area, it can earn credit against its federal tax liability.

Contact us so you can gain the full benefit of this valuable federal program.

### **Other Credits and Incentives**

Credit	Description	Triggers		
Tangible Property Repair Regulations	You can gain significant tax benefits if you made improvements to tangible property, but the IRS has placed new regulations on what you can expense and what you should capitalize.	Deductible repairs may include "incidental repairs" that help to maintain an efficient operating condition but do not necessarily prolong the property's life, add material value, or adapt the property for new or different use.		
Construction Tax Planning	BEFORE construction begins, you may qualify for tax benefits using:	Items to be considered for optimal benefits include:		
	Federal Incentives for Energy Efficiency  State & local rebates and incentives  LEED commissioning  Proper liability insurance coverage  Accelerated depreciation on all applicable building components  and more	Interior Walls (wall coverings, partitions, low walls)  Ceilings (decorative coverings, tin, wood, etc.)  Flooring (removable, adhesive types, finishes)  Miscellaneous Finishes (chair rail, crown molding)  Warehouse Applications (driver areas, walls)  HVAC, Plumbing & Electrical Systems (purpose & use)  Buildings Attached Assets (canopies, decks, flagpoles)  Typical Site Improvements		

Engineered Tax Services has been a very valuable engineering Engineered Tax Services has been a very valuable engineering resource to our firm over the past decade. We find their firm the only licensed engineering firm to be uniquely qualified to handle the complex issues regarding cost segregation, 263a, 179D and repair and maintenance. We did our due diligence and the results speak for themselves as Engineered Tax Services is the dominant engineering resource to the CPA community."

Credit	Description	Triggers	
Disposition of Assets	When you demolish or renovate a building to tear out lighting, HVAC units, and other components, they're disposed of or retired from the building; their book value can be treated as a business deduction. The tangible personal property within the structure allows for the remaining depreciable value to be written off when the asset is retired, provided the personal property is no longer in service and was not purchased with the intent to demolish. This must be identified and valued prior to demolition.	When an asset is permanently withdrawn from use when:  Sold Exchanged Retired Physically abandoned Destroyed Transferred to a supplies, scrap, or similar account	
Historical Tax Credits	By either rehabilitating directly or investing in the rehabilitation of eligible buildings, taxpayers can take advantage of one or two historic tax credits.  1. Historic Preservation Tax Credits  2. Historic Tax Incentives	Property must be listed in the National Register of Historic Places.	
Insurance Replacement Appraisals	We generate significant savings for our clients through a Detailed Engineering Insurance Replacement Appraisal (DEIRA) that is accepted by national insurance company underwriters to establish accurate property valuations, which lead to reduced insurance premiums and improve coverage terms and conditions.	Can be undertaken any time – whenever you want to save money.
